About Me

Quality assurance professional with more than 10 years of experience, I've dedicated my career to ensuring software consistency and performance through a blend of automation and manual testing. My journey began with a passion for automation, and over the years, I've evolved into a seasoned QA professional with expertise in Web, API and mobile automation. As an Agile QA, I have the chance to ensure high quality to initial phases of the development process.

Work Experience

Nov 2020 - Present
South System
Senior QA Engineer / Tech Interview Recruiter
Working on creating a new software development process with a focus on quality from defining software requirements to production. Acting as an agile quality assurance specialist, assistingthe Product Owner in crafting BDD scenarios and outlining acceptance criteria. Responsible for creating automated tests for mobile and API using Java, restAssured, Appium and Cucumber.
